

Our Workers' Compensation Claims Management Program Can Prevent Claims and Reduce Your Costs

How much could you save if your claims were reduced by 50%?

Studies have shown that our type of Claims Management Program can reduce the number of reported injuries by 40%, litigation rates by 70%, and overall claims costs by over 50%.

Of course the goal is to prevent as many accidents as possible through careful hiring, training, drug testing, and safety practices. However, a claim is bound to occur and how you deal with it can make all the difference. If you turn the claim in to the insurance carrier and assume that they are going to aggressively investigate and manage it you are going to be very disappointed.

If the claim is going to be resolved with minimal cost and disruption it is up to you, but a good insurance broker can be a valuable resource in setting up the procedures and practices that will help reach a positive outcome.

InVensure has spent many years refining our Workers Compensation Claim Management program and our program to address the 8 critical components of a best practices Workers Comp claim process.

Continued on next page...

THE 8 CRITICAL COMPONENTS OF A BEST PRACTICES WORKERS COMP CLAIM PROCESS

- Prompt reporting
- Medical Triage
- Prompt investigation
- Effective communication with the medical provider
- Modified Duty/Early Return to Work programs
- Continual monitoring of the claim with the adjuster
- Claim reserve review
- Rapid closure

In sum, InVensure's Worker's Compensation Claims Program can reduce the number of reported injuries by 40%, litigation rates by 70%, and overall claims costs by over 50%.
